

HARDD. WARFIGHTER

by A-TACS Camo® | Digital Concealment Systems, LLC
Designed in Fort Benning, Georgia

SMALL BUSINESS

SAM.gov Registration: Pending
CAGE Code: 21KS9
UEI: TEWTU656W3M6
Entity Type: LLC (U.S.)

CORE COMPETENCIES

- **Tactical Clothing & Uniform Manufacturing:** Design and production of military-grade uniforms, combat shirts, and tactical apparel in NIR-compliant, mil-spec fabrics including 50/50 NyCo ripstop and 500D Cordura. Available in Berry Compliant configurations.
- **Body Armor & Protective Systems:** Modular ballistic armor systems combining soft armor, hard plate carriers, and hybrid configurations. Products include Level IIIA soft armor panels, Level III++ ceramic/UHMWPE composite plates, and the proprietary MODE Adaptive Armor System offering three field-configurable protection modes.
- **Ballistic Helmets:** High-cut FAST ballistic helmets constructed with UHMWPE fiber meeting NIJ Standard 0106.01 and 0108.01 Level IIIA. Full modular accessory integration including NVG shroud and ARC rail systems.
- **Load-Bearing Equipment & MOLLE Systems:** Tactical plate carriers, concealable vest systems, and modular pouch platforms constructed from 500D Cordura with laser-cut MOLLE geometry. NIR compliant across all colorways.
- **Tactical Footwear:** Mission-specific combat boots engineered for extended field operations, featuring suede and nylon polyamide uppers, Speedlace closure systems, and tactical outsoles for multi-terrain use.
- **Camouflage Pattern Licensing & Application:** Proprietary development and licensed application of advanced hybrid camouflage systems across apparel, gear, and equipment. NIR-compliant print substrates including solution-dyed NyCo, 500D Cordura, and ultralight technical fabrics.

DIFFERENTIATORS

- **Proprietary NIR-Compliant Camouflage IP:** Digital Concealment Systems, LLC owns the A-TACS® camouflage platform — a portfolio of patented, science-based hybrid concealment patterns developed over 17 years and currently in active deployment by U.S. and allied special operations forces worldwide. HARDD. Warfighter is the exclusive tactical product line of A-TACS Camo.
- **Designed in Fort Benning, Georgia:** All HARDD. Warfighter products are designed and developed at the company's U.S. headquarters in the Fort Benning, Georgia military community — the home of the U.S. Army Infantry School and Ranger School. This proximity to the operational community directly informs product requirements and design decisions.
- **Full-Spectrum NIR Compliance:** NIR-compliant construction is standard across the entire HARDD. product catalog — not a premium option. All fabrics, dyes, and colorways are engineered to meet NIR reflectance standards required for professional military and law enforcement procurement.
- **Modular Adaptive Armor System:** The HARDD. MODE system is the only commercially available armor platform offering three field-configurable protection modes (soft-only concealable, hard plate carrier, hard-over-soft) from a single interchangeable component set. Patent applications in preparation.
- **Berry Compliance Pathway:** Current Phase 1 production is offshore (Singapore) to enable rapid market entry. Phase 2 establishes a U.S. cut-and-sew facility in North Georgia (target Q2 2027), positioned to achieve full Berry Amendment compliance for DoD uniform and soft goods procurement.
- **Established Defense Distribution Network:** Through partnership with ST Engineering (Singapore Technologies Engineering Ltd., \$8.5B revenue, 2,000-person worldwide sales force) and TENET Systems Pte. Ltd., HARDD. has immediate access to established defense procurement channels across Asia-Pacific, NATO allied nations, and Foreign Military Sales markets.
- **Ubisoft Worldwide Licensing Agreement:** As of June 2026, A-TACS Camo and HARDD. Warfighter gear are featured under a signed five-year worldwide agreement within Ubisoft title releases, most prominently within the Tom Clancy franchise (Ghost Recon, Rainbow Six, The Division). This agreement provides sustained, contractually guaranteed brand visibility to a global audience of tens of millions within the core tactical consumer demographic.

PAST PERFORMANCE & RELEVANT EXPERIENCE

As a new contracting entity, HARDD. Warfighter, LLC does not yet hold direct government contracts. However, the company's principals and partners bring significant relevant experience in defense supply, military pattern development, and international contracting:

- **Cut-and-Sew Contract Manufacturing:** Custom tactical gear production for other brands, agencies, and government clients. Solid color and multi-pattern capability. Phase 2 domestic facility planned for North Georgia (2027).
- **Thermal Signature Management:** Development of thermal-defeating concealment systems for dismounted operations including deployable hide sites for forward observers and sniper teams. Military channel only; ITAR review in progress.

COMPANY DATA

Legal Name:	HARDD. Warfighter, LLC
DBA:	HARDD. Warfighter by A-TACS Camo
Parent Entity:	Digital Concealment Systems, LLC
JV Partner:	TENET Systems Pte. Ltd., Singapore
HQs:	3151 Tower Road, Suite M, Columbus (Fort Benning), GA 31909
Operations:	Fort Benning, GA (U.S.) / Singapore (Asia-Pacific)
Entity Type:	LLC — Small Business
SAM.gov:	Active Registration
CAGE Code:	21KS9
UEI:	TEWTU656W3M6
Website:	harddwarfighter.com

Email:	philip@harddwarfighter.com
POC:	Philip Duke, CEO
POC (Intl):	Rain Qin, COO — info@tenet-systems.com

- **A-TACS Camo (DCS, LLC) — 17 years:** A-TACS camouflage patterns are currently in authorized use by the U.S. Army Sniper School, 75th Ranger Regiment, 3rd Special Forces Group, JFK Special Warfare Center and School, U.S. Border Patrol, DoE Nuclear Response Teams, U.S. Marshals Service, and SWAT units nationwide. International utilization includes Polish JKW Special Forces, Norwegian SOF, Chilean SOF, Ukrainian Alpha Group, and Australian SF.
- **AEGIS Advanced Composites (partner):** AEGIS holds established defense supply relationships for UHMWPE fiber, hard armor plates, and advanced composite materials for military and law enforcement customers across Asia-Pacific. AEGIS is the manufacturing partner for HARDD. ballistic helmet and armor plate components.
- **ST Engineering (partner):** ST Engineering holds active international defense contracts across 100+ countries including armor systems, munitions, and integrated security solutions. HARDD. gear is being actively promoted within ST Engineering's existing defense contract channels.
- **Stoic Tactical Solutions / Archangel (distributor):** Formal dealer quote issued January 2026 covering full HARDD. product lineup across 35-unit quantities. Stoic maintains active government and military relationships in African markets through high-level government partnerships.
- **Ranger Joe's (strategic retail partner):** One of the most established military-serving retailers in the United States, operating continuously at Fort Benning, Georgia since 1964. Strategic distribution partnership covering HARDD. Warfighter uniform replacement programs and global online sales, with direct access to the active-duty military consumer base at the home of the U.S. Army Infantry School.
- **Active Government Contract Bids:** HARDD. is currently participating in six active worldwide military procurement bids across multiple product categories as of June 2026.

KEY PARTNERS & CERTIFICATIONS

PARTNER / SUPPLIER	ROLE & RELEVANCE
ST Engineering (Singapore)	Global defense distribution; \$8.5B revenue; 2,000 rep worldwide sales force
AEGIS Advanced Composites	UHMWPE fiber; hard armor plates; helmet composites; U.S. operation in Pomona, CA
Ranger Joe's	Strategic retail distribution partner; established 19 at Fort Benning, Georgia; military uniform replacement and global online sales
INVISTA / Cordura®	Co-branding on Cordura® substrate; quality credentialing for procurement documentation
Stoic Tactical / Archangel	Government and military distribution; African market relationships; active dealer

NAICS & PSC CODES — PRIMARY BUSINESS CATEGORIES

NAICS CODE	TITLE	HARDD. RELEVANCE
314910	Textile Bag & Canvas Mills	Cut-and-sew production of tactical pouches, plate carriers, backpacks, and load-bearing systems from mil-spec textiles
315990	Apparel Knitting Mills / Other Apparel Mfg.	Manufacture of tactical uniforms, combat shirts, and operational clothing in NyCo and technical fabric blends
339113	Surgical & Medical Instrument Mfg.	Production of ballistic protective equipment including body armor systems, soft armor panels, and ballistic helmets meeting NIJ standards
339999	All Other Miscellaneous Mfg.	Manufacture of tactical accessories, load-bearing hardware, modular gear systems, and specialty field equipment
423990	Durable Goods Wholesale — Other	Wholesale distribution of tactical gear, ballistic equipment, and protective systems to government agencies and defense contractors
332994	Small Arms, Ordnance & Accessories Mfg.	Manufacture and distribution of ballistic armor components and protective systems for military and law enforcement applications

PSC CODE	TITLE	HARDD. RELEVANCE
8465	Individual Equipment	Design and manufacture of tactical nylon equipment including plate carriers, chest rigs, load-bearing systems, belts, magazine pouches, medical pouches, and mission-specific warfighter equipment.
8460	Luggage and Carrying Equipment	Manufacture of military and tactical carrying solutions including backpacks, assault packs, deployment bags, duffels, equipment bags, and transport systems constructed from mil-spec materials.
8415	Special Purpose Clothing	Design, manufacture, and distribution of military and tactical apparel including combat uniforms, field clothing, camouflage garments, training apparel, flame-resistant clothing, and mission-specific warfighter clothing systems.
8315	Notions and Apparel Findings	Production and integration of tactical sewing components including webbing, hook-and-loop fasteners, buckles, binding tape, elastic materials, hardware, and load-bearing attachment systems.
8470	Personal Protective Equipment and Armor	Manufacture and assembly of protective systems including plate carriers, armor carriers, ballistic equipment platforms, and protective load-bearing solutions designed for military and law enforcement applications.
8430	Tactical and Military Footwear	Development, sourcing, and distribution of military and tactical footwear designed for field operations, training environments, and mission-specific performance requirements.
8305	Textile Fabrics	Sourcing, processing, and integration of military-grade textile fabrics including camouflage materials, Cordura®, webbing, laminate fabrics, and other mission-specific performance textiles.
